

CONTINUOUS GUTTER (CG70, CG75, CG80)

INCREASE YOUR COMPANY'S PROFITS WITH DMI CONTINUOUS GUTTER

DMI manufactures a Continuous Gutter (CG) on a state of the art, 18 station, fixed base roll former to ensure an aesthetically pleasing, high performance product. We offer the gutter in three widths to handle your water run-off requirements. Our Continuous Gutter (CG) is available with a straight back or a flange back for installation on both steep and flat roofs.

Available up to 52' lengths

- Fabrication Savings
 - Save time and money by having DMI fabricate your gutter for you in continuous lengths
- Installation Savings
 - Longer pieces = fewer pieces : less installation time
 - Fewer pieces = virtually eliminate splice joints
 - Less splice joints = less labor to install
 - Quick installation of the DMI gutter strap: clips in the front before the gutter is hung, then fastened through fascia after gutter installation
- Complete Accessory offering available
 - Save time : Order all the components from a single source
 - Gutter Straps
 - Downspouts 3"X4" to 5"X6"
 - Gutter Under brackets
 - Downspout Drops & Elbows
 - End Caps
 - Downspout Straps
 - Expansion Joint Cover Plates
 - Mitered Gutter Corners
