

DMI CP75 is a corrugated structural panel designed for roof or wall applications. The panel has a consistent $\frac{3}{4}$ " symmetrically round pattern that can be used to add a classic look to a building's walls or roof. This lightweight panel can be used on a wide range of building designs. The DMI CP75 is available in 24 and 22 gauge steel as well as .032 and .040 aluminum.

Uses and Applications

This exposed fastener panel can be installed vertically or horizontally, dependent upon your design needs or the chosen application. When installed vertically, this panel can be wrapped around radius walls to add a clean look to your design. The DMI CP75 can be installed on exteriors or interiors.

Advantages

- Easy through fasten panel reduces installation time.
- The anti-siphon leg prevents capillary action with roof installations.
- Available in all 32 of DMI's color selections.
- Custom color coatings are also available to match any specific color scheme needed on the walls or roofs of your building.
- Continuous lengths make for easy installation (1'-35' panel lengths)

Please consult DMI Color Chart for stocking color availability.

†Metallic colors are directionally sensitive and therefore entire roof areas should be ordered at once time to ensure uniformity.

*Brite Red has a clear coat. **Premium colors carry an upcharge.

Since 1988 Dimensional Metals, Inc. (DMI) has specialized in the manufacturing of architectural metal roof and wall panel systems as well as fabricated architectural sheet metal for the construction industry. We are backed by decades of proven metal envelope design, dependable Technical Field Services, and an Engineering Department delivering sustainable solutions. You are sure to find the product that will best enhance your design.
